*Ranking is determined by number of unique searches (totaling approximately 32M per month) by make/model made between September 1-30, 2016 across Vast's automotive inventories of 4M+ used vehicles. Previous month's rank in ().

ABOUT CARSTORY

CarStory is the industry's largest provider of search and inventory data and analytics on used vehicle pricing and preferences synthesizing over 4M real-time used vehicle listings each day. With data from over 8M searches a week, CarStory provides more than just information. We draw on our industry-leading dataset and patented algorithms to provide true insights—curated recommendations and contextual details—that help shoppers make better decisions. By uncovering facts, features and competitive differentiators that make each vehicle unique in a local market, CarStory offers consumers the confidence they need to condense the sales process and drive happily ever after.

**Best Deals are calculated by comparing the advertised price to the CarStory predicted price on each of the approximately 4M used vehicles in our inventory. The CarStory predicted price is calculated using our patented model to look at vehicle features (year, mileage, trim, drive, etc.) and evaluating how these features vary with price for other similar vehicles in the area. Make and models with the highest average collective savings are shown for each Designated Market Area (DMA) on September 30, 2016. ©2016 Vast.com, Inc. All rights reserved.
